High Winds

- The safest place to be during high winds is indoors. Postpone outdoor activities if a wind advisory or high wind warning has been issued.
- Stand clear of roadways, a gust may blow you into the path of an oncoming vehicle.
- When you are driving, keep a safe distance from cars in adjacent lanes because a strong gust could push a car outside its lane of travel.
- Watch for flying debris. Tree limbs may break and street signs may become loose during strong wind gusts. Keep an eye toward nearby balconies for loose objects that may fall.
- Park your car against the wind direction to prevent your car door from being pulled when opened.
- Use handrails where available on outdoor walkways and avoid elevated areas such as roofs without adequate railing.

Fire Safety Tips

65th Fire & Emergency Services

- Make an escape plan;
- Know at least two ways out;
- Have an outside meeting place.

Fire Drill/Emergency

S - Sound the Alarm
P - Phone the Fire Department (9-1-1 295-571-911) and Pull Station
E - Extinguish if Possible
E - Evacuate the Building
D - Direct the Fire Department to the Fire

Quotable Quote:
“Your first mistake could be your last – choose wisely.” – Eileen MacKenney

Are telephone and electrical cords located where they do not pose a tripping hazard?
